QTAKE Remote Stream Access Guide | Updated 23/2/2024

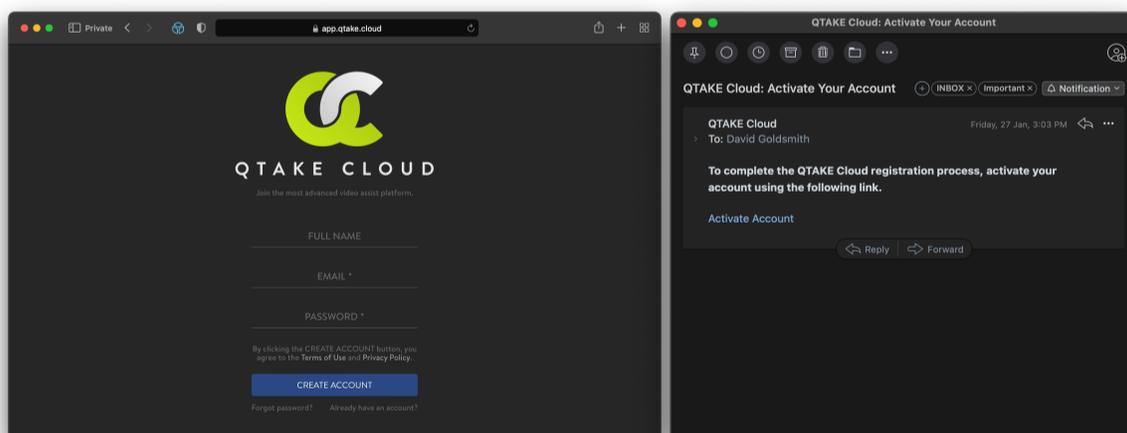

QTAKE VTR systems can be configured to provide a low latency, high quality video stream over the internet. The view(s) provided over this stream can mirror that of any given on-set monitor, or be completely unique.

Accessing the Stream

- The QTAKE operator will provide users/production with a project streaming link.
- After navigating to the project link you will be prompted to sign into QTAKE cloud.

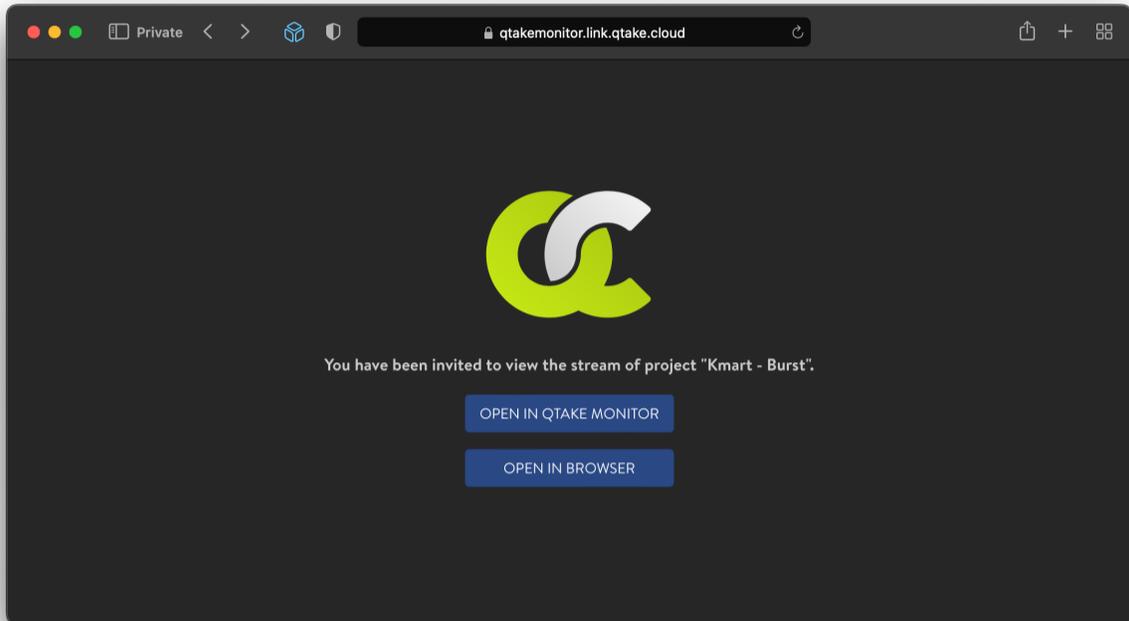

- If you do not already have an account you will need to create one by clicking “Sign up for an account” and confirming email address.

QTAKE Remote Stream Access Guide

- If already signed in or once an account has been created the user is presented with the option to launch:
 - the QTAKE monitor app (best used if streaming on an iPad) or,
 - in the browser (Safari on MacOS or Chrome on Mac/Windows).

- Select "OPEN IN BROWSER".

- To enter the full screen user interface, click the highlighted buttons to minimise these elements.
